

Please, I urge you to reject the NAB's petition 04-160. I love satellite radio. It is one of the best of the new technologies. I get the kind of music and entertainment I want without the annoyance of commercials and talky announcers. I would even be happier if I could get local weather and traffic updates over my satellite radio.

Since I pay for these satellite services, the National Association of Broadcasters should not be dicatating what I am permitted to hear. It is American right to be able to receive this type of service.
